BOOK SYNOPSIS

The universal claims of both the I Ching, "the book of changes", the compendium of Chinese natural knowledge and the genetic code, "the book of life", encouraged Dr. Schönberger to establish the hypothesis of a general system in nature. He has verified in numerous parallels the congruence of both the I Ching code and the genetic code. The sensational results are detailed for the first time in this book. The "I Ching & the Genetic Code" is an important and exciting link between science and spirituality!
