BOOK SYNOPSIS

This book provides professors with the insights and tools necessary to achieve higher levels on accountability assessment outcomes while preparing students for enhancing their own career success in a more complex future. In recent years, many initiatives have been implemented by a number of state legislatures and boards of trustees to increase “institutional effectiveness.” These measures have made colleges and universities aware that practices once accepted as sacrosanct within the culture will, from this time forward, be assessed regularly for their contribution to achieving more accountable outcomes. This book equips professors to address outcome goals in a proactive manner.
